

Important circular

Date:18/05/2020.

Dear Parent,

Team Pragathi Central has been consistently connected with children through various alternative learning/lifeskill activities all along during this lockdown period.

We would now like to give the kids (of Pre Primary to Grades 7, 9 and 10) a break from daily activities / live, online classes / video classes from tomorrow onwards and from 23/05/2020 for Grade 8 students. However, some innovative and interestingly engaging holiday homework will be sent to kids along with a time table by tomorrow evening.

Please ensure that your child follows the time table and learns from the tasks given by school.

Online classes, recorded video lessons alongside live, online classes will commence from 1st or 2nd week of June. The dates of commencement of online classes will be intimated in June. These online classes will continue until it is considered safe by the Govt for children to get back to school.

We as a school are with our students and will make certain that no learning stops. It is our responsibility that our students' academics continue through online platforms.

The wisest way to prevent our kids from Covid19 now and in future is to boost their immunity. Please follow and get kids to fill the immunity boosters chart which will be sent along with the holiday homework, on a daily basis.

Stay safe - Stay home - Stay immune by eating foods that boost your immunity and furthermore, please allow kids to follow the daily exercises/dance videos which will be uploaded on the school website. Immunity gets better with certain foods and regular physical exercises which kids can do in their homes.

We sincerely appreciate the spirit and obedience our students are exhibiting by doing all that is directed by their parents and the school. We thank our teachers for continuing to stay connected with our students during these tough times.

Thanking all our parents for their cooperation and support, always.

Do mail us in case of any queries principal.pragathi@gmail.com

Note: Please monitor children's online/internet activities at all times.
